Reimagining Student Mobility Webinar:

Direct Parent Payment as a Mobility Support

Parent Payment provides schools with a versatile alternative to traditional bus or van services, effectively addressing driver shortages and high costs of providing mobility support.

In this fourth Reimagining Student Mobility webinar, Carl Allen, 4MATIV's CEO, Debbie McKintosh, Connections Coordinator of West-MEC in Phoenix, AZ and Gavin Pielow, Manager of Operations of Meeting Street Jasper & Beaufort in Hardeeville, SC discuss direct parent payment as a mobility support.

4MATIV is transforming student mobility. With our technology and performance management platform and multi-modal approach, we get students to school for less cost and with less hassle so they can access the learning opportunities that maximize their potential. For more information, visit 4mativ.org.
