Reimagining Student Mobility Webinar: A Policy Playbook

An overview of solutions for creating a student-centered transportation network that's more accessible, equitable, flexible, and costs less.

In this third Reimagining Student Mobility webinar, Carl Allen, 4MATIV's CEO, discusses 4MATIV's view on the challenges of student mobility and how transportation is a key barrier to equitable access. We unveil a playbook that outlines state-level policy priorities for policymakers and advocates and explore practical policy solutions for creating a more accessible, student-centered, and equitable transportation network that adds flexibility and lowers costs.

4MATIV is transforming student mobility. With our technology and performance management platform and multi-modal approach, we get students to school for less cost and with less hassle so they can access the learning opportunities that maximize their potential. For more information, visit 4mativ.org.
